

Merry Christmas

It is warm outside and there's no snow far and wide
Nothing is going on at the Christmas market anyway
I am so in the Christmas spirit
Like never before in my life
At Christmas I plunge myself into pleasure

Chorus:

I wish you a merry Christmas and peace all over the world
Much love and more tenderness because love is all that matters

Suddenly there's a girl next to me
A blond angel often dreamed I of her
It was love at first sight
Her hand strokes through my hair
Then tenderly she whispers in my ear

I wish you a merry Christmas and peace all over the world
All my love I give to you because love is all that matters

Interlude:

What can a blond angel do if her lover is too tired tonight?

It is cold outside and snow is trickling quietly
The mulled wine warms us and the Jagatee
My girl is very close to me
She makes my heart tremble
On cloud nine we're both floating

I wish you a merry Christmas and peace all over the world
Much love and more tenderness because love is all that matters

I wish you a merry Christmas and peace all over the world
Much love and more tenderness because love is all that matters

I wish you a merry Christmas and peace all over the world
Much love and more tenderness because love is all that matters
